

INTILED PROFILE

What we do?

We manufacture professional lighting systems, specialized in project-based integrated solutions for facades, bridges, transport infrastructure, sports facilities, high-rise buildings and large-scale sites. We are inspired when we get to develop and implement complex lighting systems

Why we stand out from the rest?

We develop and produce integrated lighting systems comprising all the required wiring and control systems, professional software and all possible accessories for the convenient operation and coupling of the exterior lighting system with the third-party systems onsite.

All you NEED For #SCAPE Lighting

Floodlighting

Accent Lighting

Media facades

Contour Lighting

Lighting effects

Adler-Arena skating center

Sochi Gazprom center

We take special pride in and draw much of our experience from the multitude of completed projects for the 2014 Sochi Olympics, the World Aquatics Championship in Kazan, the 2018 FIFA World Cup and other large-scale international events

Kazan Water sport palace

Research, development and production cycle

An IntiLED luminaire is an entirely in-house product: from rough drafts to complete certified product included in the lighting system.

Customization possibilities

Any IntiLED fixture may be reworked to comply with the specific project. Moreover, we are able to create a brand-new product that will be characteristically unique and fitting the full range of particular project requirements.

Hosing colors and coverings

Accessories

Lighting equipment tested in harsh conditions:

sea version

100% humidity, additional
protection from vibration

Russian bridge, Vladivostok

northern version

-55°C operating temperature,
glass heating system

President headquarters, Novosibirsk

tropical version

100% humidity, +55°C

«Qala Alti SPA», Baku

Certification

Our lighting systems are fully compliant with all international standards and can be adapted to any wishes and needs of the client, for instance

- EAC
- CE
- IK (mechanical resistance)
- M1 (marine tests: salt and moist)
- Wide temperature range (-50°C to +55°C)
- Tropic edition version with confirmed characteristics (+55°C, 100% humidity)
- Dustproof and waterproof
- Tests for temperature drops
- High vibration
- LEED Gold standard
- Strong wind loads
- Dark sky standard
- Anti-glare requirements
- Fire-safe cabling

Hi-tech production

customized to produce unique lighting solutions for each project.

At IntiLED we pay special attention to in-process quality control and the product configuration. IntiLED has achieved high manufacturing efficiency and flexibility due to implementation of

Services

We adhere to an individual approach in partnerships, providing the best possible conditions for each specific project. We will ensure thorough support in creating a lighting project, presenting it to the client, installing and commissioning the equipment.

Why we are intrusted with major projects around the world?

While working on an international-scale major projects we know how to fully satisfy strict requirements a manufacturer faces:

- each project is assigned an individual workgroup consisting of engineers, builders, service managers, control system managers and project managers
- we instantly respond to the multiple changes in the project
- we can boast a high level of localization and low supplier dependency
- we are located close to the sea port and have excellent logistics capabilities
